WHO WE ARE & WHY WE EXIST

Our Mission: To empower a communication fragile at-risk generation teaching minority boys and girls how to overcome three hurdles that threaten their success: crime, poverty, and racism.

The Mindset Foundation is a 501c3 nonprofit organization operating in Columbus, Ohio. Through our inner-city youth initiative development program, we are inspiring and equipping minority boys and girls with the skills needed to be effective communicators, problem solvers and purpose driven volunteers who can build up any community. We deliver a year-round program experience through our "**Yes To Anything**" program that includes activities along our four pillars: **Communication, Gifts, Talents, Skills & Service.**

"The Mindset Foundation's primary emphasis is creating growth & opportunities for demographically diverse groups and kids to participate in the very idea of the American Dream." Kenneth E. Brown Jr, Co-Founder

The Mindset Foundation, Inc., created in 2019, is a world class Information Technology & Communication company that works to develop our young people into communication strategists who will lead the next generation of leaders. Through our "Yes To Anything" program we expose our youth to enrichment activities giving them the opportunity to tap into their God Given Gifts & Talents, Effective Communication Skills by understanding the 4 personality types and giving them access to Blue Collar professionals who can teach them on the spot trades like: Carpentry, Electric, Plumbing & Heating/Cooling.

The Mindset Foundation also provides community support for our proud seniors and veterans who need assistance in home maintenance, lawn care and landscaping. We take our youth out into the community with their Gifts, Talents and, learn skills to provide needed services as requested at no cost to our seniors and veterans year-round.

The Mindset Foundation is not just another youth organization, nor simply entertainment! We are about taking pride in being an American. Thanking God that we live in a country where we **All** can pursue our own individual dreams. We are about instilling in our youth the traditional values that made America the greatest country on earth. Mom's apple pie, Andy Griffith and Opie, and Fishing are all synonymous with wholesome values and what it means to be an American. We are hopeful of America's youth, within them lies our future legacy as a **Great Nation!**
